EDUCATION

YH Akademin

System Developer .NET

Studies focused on C#/.NET, databases, web applications, agile development, testing, and cloud publishing.

2026 - current

Jensen Komvux

Network and IT Support Technician

Education focused on administration and configuration of network, server, and client systems.

2024 - 2025

Palm Beach College

Associates Degree Nursing

Education received as a qualified nurse with knowledge in medical care, patient interaction, and clinical decision-making.

2001 - 2005

LANGUAGE

English - Native Language

Swedish - Good written and spoken proficiency

PROJECTS

- **BookMarked** - Recruitment Test: Full-stack CRUD application built with Angular 20, TypeScript, and a .NET 9 C# REST API. Implements JWT-based authentication, registration and login, protected API requests, CRUD functionality for books and quotes, responsive Bootstrap design, frontend/backend integration, and deployment
- **Hotel Reservation App** - Booking system built with C#, .NET, SQL Server, and Entity Framework Core using layered architecture, dependency injection, LINQ, migrations, CRUD functionality, and validation. Includes booking logic, calendar management, invoicing, payment registration, and rules to prevent invalid bookings.
- **Danibot** - AI-assisted web-based chatbot built with HTML, JavaScript, GitHub Actions, Terraform, and AWS. Uses an automated CI/CD pipeline, Infrastructure as Code, EC2, S3, IAM, Lambda, SSM, and Nginx for deployment and operations.

DANNELL BAYER

.NET Student

SUMMARY

Building a strong foundation in C#, OOP, clean code, and SOLID principles, with a practical focus on reliable systems and user-focused development. Experienced in healthcare, operations, and DevOps-related environments, bringing strong problem-solving, documentation, and communication skills. Seeking LIA placement from March-May and August-November 2027.

WORK EXPERIENCE

Bigif AB Intern - Workplace-Based Learning (APL)

2025

Gained hands-on experience with AWS services, GitHub, and Terraform in a team-based DevOps environment. Learned and applied fundamentals of CI/CD, infrastructure as code, automation, scripting, and technical documentation, while strengthening troubleshooting, collaboration, and practical problem-solving skills.

Prometric Test Proctor

2022 - 2023

Administered professional certification test sessions in a secure, process-driven environment. Monitored systems, resolved technical issues, and documented incidents through reports and correspondence. Recognized for quickly learning new systems, working independently, and taking responsibility for daily operations.

Dani's Beauty Parlour Business Owner

2021 - 2022

Created and maintained the company website for a small beauty business, including content updates, troubleshooting, and ongoing improvements. Managed client communication, scheduling, and service delivery while building strong customer relationships through reliable, professional service.

Various healthcare facilities Registered Nurse

2005- 2020

Coordinated patient care using digital systems and administrative tools to manage documentation, follow-ups, and team communication. Built strong skills in accuracy, prioritization, troubleshooting, and process improvement while working in fast-paced, high-responsibility healthcare environments.

SKILLS

- Software Development: C#, .NET, ASP.NET Core, MVC/Razor, OOP, SOLID principles
- Frontend: HTML, CSS, JavaScript, Bootstrap, responsive design
- Databases: SQL Server, Entity Framework Core, relational database design, CRUD functionality
- Cloud & DevOps: Azure basics, AWS fundamentals, CI/CD, GitHub, Terraform, automation basics
- Tools: Visual Studio, VS Code, SSMS
- Networking & Systems: Windows, Linux, Windows Server, Active Directory, DHCP, DNS, SSH, VLANs, WLAN, routing basics
- Professional Skills: Problem-solving, communication, documentation, collaboration
